AB Presented is a composition, and method thereof, that is useful for the treatment of various viral infections and inflammatory diseases of skin and membranes. The method may be carried out using compns. comprising alc. of the general formula R1CH20H [R1 = CH3-(CH2)7-CH=CH-CH2-(CH2)x, x = 6, 8, 10, 12], or comparable compns. that may also include other physiol. active constituents that do not interfere with the efficacy of the primary composition of the present invention. The compns. according to the present invention may further comprise salts of long chain fatty acids and/or mixed chain esters and unreacted wax esters. The compns. may be obtained by the base catalyzed alcoholysis reaction between a wax ester and an alkyl alc. or hydrolysis reaction of wax esters.
